

Dear Visitors,

The involved codes is written by Python 3.5 as a project in Pycharm IDE. Thus, for those who are interested in our work, it is recommended to import this project into Pycharm and click “Run” to execute each source. The illustration is shown below.

Fig. 1. The Illustration of Executing a Source File

Besides, since we plan to expand and commercialize the project, we obfuscate some parts of the code. Nevertheless, this obfuscation does not affect the correct execution of the code.

Sincerely yours,

The developers
